Terracota
BLUM S.A.

# Acerca de nuestros productos

## Propiedades de la terracota:

Las macetas de terracota, **no se deterioran con los rayos UV,** pudiendo permanecer a la intemperie sin daños.

***Su peso*** impide que el viento o alguna mascota las tire.

***Protegen mejor las raíces de las plantas*** frente a lluvias prolongadas, heladas o sol directo. Cuando se calienta la maceta, la humedad se evapora desde su exterior gracias a la porosidad del material.

***Su permeabilidad*** permite que las raíces de las plantas se nutran de aire y humedad, fundamentales para su buen desarrollo.

***Actúan como esponjas*** absorbiendo el exceso de humedad de la tierra.

La nobleza y simplicidad de la terracota les otorgan la ***facilidad de realizar diversas intervenciones,*** manualidades y trabajos de decoración sobre ellas, como por ejemplo pintarlas.

## Común
